

**CLAIMS**

1. A fixing for a bag, the fixing comprising a bag loop and a fixing loop  
5 along with a clip which comprises two limbs arranged in use to extend respectively into the bag loop and the fixing loop to ensure robust association between the bag loop and the fixing loop, thereby restraining the bag loop and fixing loop against relative movement between them.
- 10 2. A fixing as claimed in claim 1 wherein the clip comprises a hairpin arranged to close at one end with lateral bulging when closed to restrain the bag loop and/or fixing loop.
3. A fixing as claimed in claim 2 wherein the lateral bulging is outward.
- 15 4. A fixing as claimed in claim 1 wherein the clip is open ended with sufficient resilience to ensure robust association and the limbs provided with bias bulging to provide restraint of the bag loop and/or fixing loop.
- 20 5. A fixing as claimed in any preceding claim wherein the clip includes a shaped surface to engage and restrain the bag loop and/or the fixing loop.
6. A fixing as claimed in any preceding claim wherein two shaped surfaces are provided in the clip to co-operate in order to restrain the bag loop  
25 and fixing loop between them.
7. A fixing as claimed in claim 6 wherein the two shaped surfaces are opposed.
- 30 8. A fixing as claimed in claim 6 or claim 7 wherein the two shaped surfaces are reciprocal with re-entrant portions to restrain the bag loop and fixing loop between them.

9. A fixing as claimed in any preceding claim wherein the clip penetrates the materials from which the bag loop and/or fixing loop are made in order to restrain these loops and/or lock the limbs together.
- 5 10. A fixing as claimed in any preceding claim wherein the clips are made from plastics materials or metals or a combination thereof with plastics materials to provide grip portions and metal parts to ensure robust association.
- 0 11. A fixing as claimed in any preceding claim wherein the clip ends are closed together by detent or latch engagement.
12. A fixing as claimed in claim 11 wherein the clip ends are closed by interleaving notch engagement between respective ends of the limbs.
- 15 13. A fixing substantially as hereinbefore described with reference to the accompanying drawings.
14. A bag including a fixing as claimed in any preceding claim.
- 20 15. A bag as claimed in claim 14 wherein the bag loop comprises a band of material secured to a wall of the bag.
16. A bag as claimed in claim 15 wherein the band is sectioned to form a
- 25 number of bag loops.
17. A bag as claimed in claim 15 or claim 16 wherein bands of material are secured to the wall one on top of the other with different section spacings to form different sized bag loops.
- 30 18. A bag substantially as hereinbefore described with reference to the accompanying drawings.

19. Any novel subject matter or combination including novel subject matter disclosed herein, whether or not within the scope of or relating to the same invention as any of the preceding claims.
